REVENUE OPERATIONS & GTM SYSTEMS | SALESFORCE + DYNAMICS 365 | AUTOMATION & AI

PROFESSIONAL SUMMARY

Revenue Operations and GTM systems leader with 7+ years of experience owning and modernizing enterprise CRM, business applications, automation, analytics, and revenue processes across Salesforce and Microsoft Dynamics 365. Led a completed Salesforce-to-Dynamics 365 transformation supporting a 600+ user revenue organization and now drive post-go-live platform optimization, governance, adoption, and continuous improvement. Combines hands-on systems expertise with cross-functional leadership across Sales, Finance, Marketing Operations, Legal, Delivery, IT, and external partners. Experienced translating complex business requirements into scalable workflows, data models, integrations, reporting, approvals, and AI-enabled capabilities.

PROFESSIONAL EXPERIENCE

Lead Revenue Operations Analyst

Jun 2025 – Present

CSG | Denver, CO

- Own CRM and GTM systems optimization, governance, and delivery for a 600+ user revenue organization spanning Dynamics 365 Sales, Power Platform, and integrated GTM technologies.
- Led CSG's completed enterprise Salesforce-to-Dynamics 365 transformation, migrating 500K+ CRM records and 65K+ documents while driving process redesign, data modeling, automation, testing, rollout, and adoption.
- Drive the post-go-live CRM roadmap across platform enhancements, workflow optimization, data governance, user adoption, and continued modernization of revenue processes.
- Lead cross-functional business systems initiatives across discovery, requirements, solution design, configuration, testing, UAT, rollout, and iteration with Sales, Finance, Marketing Operations, Legal, Delivery, IT, and partners.
- Design, build, and extend Dynamics 365 and Power Platform solutions using Dataverse, Power Automate, model-driven applications, JavaScript, and HTML to automate complex revenue workflows.
- Lead AI-enabled revenue technology initiatives involving Microsoft Copilot and generative AI for automation, prototyping, analysis, and seller productivity; supported a roughly 300-user Sales Copilot pilot.

CORE TECHNOLOGY & DELIVERY

Dynamics 365 Sales • Salesforce Sales Cloud & Experience Cloud • Dataverse • Power Automate • Salesforce Flow • Power BI • JavaScript • HTML • Python

Cross-functional discovery • Solution design • CRM SDLC • Workflow automation • Data architecture • UAT • Governance • User enablement

ADDITIONAL GTM PLATFORMS

Clay • Salesloft • ZoomInfo • Lusha • LinkedIn Sales Navigator • Microsoft Copilot • Glean • Generative AI

EARLIER EXPERIENCE

Senior Revenue Operations Analyst

Mar 2022 – Jun 2025

CSG | Denver, CO

- Owned Salesforce solution design and delivery across the SDLC, translating revenue-process requirements into data models, workflow automation, approvals, reporting, validation, and improved user experiences.
- Built Salesforce solutions using custom objects, dynamic forms, validation rules, approvals, and Flow automations to improve process consistency, data quality, visibility, and governance.
- Designed and launched a CRM-native revenue model, replacing spreadsheet-based processes with product-specific calculations, opportunity-stage gates, Finance validation, approval controls, and locked attainment outcomes.
- Redesigned presales intake and solutioning through guided Salesforce Flows, improving requirement completeness and structuring downstream solution design and pricing.
- Built a dual-function solution and pricing approval workflow that centralized decisions, improved governance, and strengthened proposal completeness and turnaround.
- Led cross-functional discovery, design-thinking, and customer-experience workshops during a special customer consulting assignment, identifying process improvements and opportunities for annual operational savings.
- Helped optimize GTM technology spend, contributing approximately $40K in vendor savings through platform and contract rationalization.

Revenue Operations Business Analyst II

Apr 2019 – Mar 2022

CSG | Denver, CO

- Led acquisition data migration involving tens of thousands of CRM records through mapping, cleansing, transformation, validation, and alignment to Salesforce's target data model.
- Built and automated executive reporting across pipeline, sales performance, conversion, and revenue trends to improve GTM visibility.
- Designed and built a Salesforce application for M&A corporate strategy, improving structured data capture and executive visibility into acquisition targets.
- Developed partner-tracking functionality for Salesforce opportunities, strengthening visibility into partner-involved deals.
